
What do we really know about happiness, contentment, satisfaction, delight, pleasure, joy, and bliss? Ten years ago the answer might have been: Not much, except for a few nuggets from the great wisdom traditions. Traditional thinking was mostly pretty negative about the possibility of happiness. Freud thought that even the most successful therapy could only produce “normal everyday unhappiness” at the best.
We now know a lot more about positive experiences and the sense of flow, as psychologist Mihaly Csikszentmihalyi (“cheek-sent-me-high-ee”) has called it. We now have a lot of good scientific studies, some of them from the same people who pioneered the study of depression a few decades ago. (They’ve figured out that this is more fun.)

We also know much more about the brain in “higher” states of consciousness, including advanced Tibetan meditators, TM meditators, and mystical states in Carmelite nuns. Some remarkable patterns of brain activity have been found over and over again. There is good evidence about the brain chemistry of positive (and negative) consciousness. Dreams and twilight states are also coming into better focus as a remarkable source of creativity.

Human beings have tried to change their own conscious experiences for thousands of years. We know about a huge range of claims about higher states, drug states, hypnosis, mindfulness, states of mental ‘flow,’ deeply absorbed states, lucid dreaming, states of ecstasy, of sexual pleasure, esthetic trance, personal transformation, emotional highs and lows. A lot of those claims have been very hard to verify, but we will touch on most of them, and explore our best evidence in depth.

This course doesn’t promise to teach how to have positive states, but we will explore what is known, what our most credible findings are, some speculations about higher states, and a lot questions that we can’t answer as yet. We do expect this course to be fun.

Some specifics:

We are currently testing ConnectPro as our teaching platform. All web conferencing platforms benefit if you have have a good headset (Skype style), and a good connection.

The textbook will be chosen by February, 2010.

Additional readings, videos, podcasts, powerpoints, lectures and images will be provided on our website or emailed to you. We will send out a weekly email to all participants.

Live Discussions will be held online on weekends, to help you to participate at a convenient time. (Times posted are Pacific Time. See this link for your own Time Zone).

Asynchronous Discussions will be available to those who cannot join in live.

Webcourse registration is open to all.
You can send in your Registration Form by email, regular mail or fax. Please email center@u.arizona.edu if you have any questions.

Fax: 520-626-6416
Telephone: 520-621-9317

To be on our Center for Consciousness Studies announcements list, please email center@u.arizona.edu. Please type “Attn: Webcourse Notification” in the subject line.

2. Advanced Seminar on Mind, Brain & Consciousness (Spring, 2010)

The Advanced Seminar on Mind, Brain & Consciousness will take place on Sundays at 2-4 pm Pacific Time. It is currently covering a huge range of topics --- the only requirement is a source of reliable evidence --- either scientific, experiential, or reliable reports about conscious experiences. (As in the case of consistently reported mystical states.)

The Advanced Seminar is tailored for specific member needs and interests. The Seminar will be smaller and somewhat more demanding than the Introductory WebCourses, with advanced readings and a college textbook by Baars & Gage (2007) Cognition, Brain & Consciousness: An Introduction to Cognitive Neuroscience. (Elsevier, Inc., Academic Press). See Amazon or similar source.

Additional readings, videos, podcasts, powerpoints, lectures and images will be provided on our Seminar website or emailed to you. We will send out a weekly email to all participants.

We expect to use the ConnectPro platform that has worked well in the current Seminar.

For the Advanced Seminar please email Dr. Baars before registering. (bbaars@nsi.edu)

Your Registration Form can be sent by email, phone, fax or regular mail.
